Mortgage obligation reminders:

- Your mortgage with us requires you to maintain Replacement Value Fire and Extended Perils Insurance on your property. Extended perils insurance covers such things as damage caused by lightning, windstorm, explosion and vandalism, among other things.
- In addition, your property insurance policy must be renewed each year and must show CIBC Mortgages as the first "Loss Payee". This means that in the event of damage to your home or property, CIBC Mortgages will be first to receive insurance proceeds which, as stated in your mortgage contract, we can elect to use to repair the damage, reduce the mortgage loan outstanding and/or pay you.

Pay down your mortgage loan faster

There are several ways to "pay down" your mortgage loan and get out of debt faster without incurring any prepayment charges.
1. You can increase your payment amount by up to 100% of the original regular payment, at any time over the mortgage loan term. This allows you to pay down your principal faster.
2. You may have the option to make your regular payments more frequently, which saves you money in interest charges over the long run as your principal is paid down faster.
3. You have the option of making lump-sum payments (up to your allowable prepayment privilege amount) without incurring any prepayment charges.
4. All mortgage loans become open at the end of the mortgage loan term. This means you can pay as much as you want on your mortgage loan at renewal.

Mortgage loan prepayment information

Your annual prepayment privilege: $155,999.90

If you were to pay out your mortgage loan before the end of your term or make a prepayment greater than your allowable prepayment privilege, a prepayment charge may apply. The prepayment charge for a fixed rate closed mortgage loan is the greater of:

- three months' interest on the amount you are prepaying. Interest will be calculated at your annual mortgage loan interest rate, plus any interest rate discount you received.
- the "Interest Rate Differential" (IRD) on the amount you are prepaying. The IRD amount is the difference between the following two amounts:
  - interest over the remaining term of your mortgage loan, calculated at your current mortgage loan interest rate, plus any interest rate discount you received. Interest is calculated using your current principal and interest payment amount, and compounded semi-annually not in advance.
  - interest over the remaining term of your mortgage loan, calculated at CIBC's current posted interest rate for the comparison mortgage loan as set out in the chart below. Interest is calculated using your current principal and interest payment amount, and compounded semi-annually not in advance.

Things you should know (continued)

due to a disability, involuntary job loss, critical illness or in the event of your death. To learn more about coverage options, visit www.cibc.com or call 1 866 525-8622†

Please keep this statement, as you may need it for income tax purposes.

Invest today for your tomorrow – One of the most effective ways you can help ensure that happens is to take advantage of a Tax-Free Savings Account (TFSA). A TFSA is a great way to save and a great way to invest. Watch your money grow tax-free but with the added flexibility that comes with full access to your money. To learn more, visit www.cibc.com, speak with your CIBC advisor, or call us at 1-800-465-2422.

Mortgage loan prepayment information
(continued)

If the remaining term of your mortgage loan is:	We will use our posted interest rate for a CIBC brand closed mortgage loan product similar to yours with a term of:
Less than or equal to 12 months	6 months
Greater than 12 months and less than or equal to 18 months	1 year
Greater than 18 months and less than or equal to 30 months	2 years
Greater than 30 months and less than or equal to 42 months	3 years
Greater than 42 months and less than or equal to 54 months	4 years
Greater than 54 months and less than or equal to 78 months	5 years
Greater than 78 months and less than or equal to 102 months	7 years
Greater than 102 months and less than or equal to 120 months	10 years

The following factors could cause the prepayment charge to change:

- the remaining term of your mortgage loan changes. This type of change could affect your prepayment charge in two ways:
    i. The prepayment charge is based on the amount of interest charged over the remaining term, so a change in the remaining term affects the amount of interest charged.
    ii. If the remaining term of your mortgage loan changes, a different comparison mortgage loan product, and therefore a different comparison mortgage loan rate, may be used.
- CIBC's posted rate for the comparison mortgage loan changes.
- the amount of your regular principal and interest payment changes.
- the principal balance of your mortgage loan changes; for example, if you miss a scheduled payment, or make an extra payment.
- the term of your mortgage loan is greater than 5 years and you are beyond the fifth anniversary date and are prepaying the mortgage loan in full. The prepayment charge would be three months' interest calculated at your mortgage loan interest rate.

Cash Back Repayment - You did not receive cash back at the time you entered or renewed your mortgage loan.

Mortgage loan prepayment information
(continued)

Other charges that may apply – A discharge fee or assignment fee for document preparation and registration when the mortgage loan is prepaid in full.

You should call CIBC Mortgages at 1-888-264-6843 if you have questions on calculating your prepayment charge. You can also visit CIBC website at www.cibc.com to estimate your prepayment charge by using the online Mortgage Prepayment Charge Calculator.
